Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-2, 5-6, 21 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by CHUTTER (6,454,795).

As to claims 1-2, 5-6, 21 and 24, CHUTTER (Figs. 10-12) discloses longitudinal or curved members 12/14 having thickness greater than the width (Figs. 11-12), circumferential members/merge sections/connections 16 and opposed contact surfaces near the circumferential members/merge sections 16 as claimed. Notice that CHUTTER stent has substantially the same structural configuration as the stent in the present invention, therefore, CHUTTER stent also behaves the same as the endo-prosthesis as claimed in the present invention. When CHUTTER stent is collapsed, the circumferential members 16 bend until the opposed contact surfaces come together and then continued deflection of the longitudinal members produces stress at the contact

Art Unit: 3731

surfaces to thereby isolate the ends 16 of the longitudinal members 12/14 from stress due to forces associated with collapsing the endoprosthesis.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 26-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over CHUTTER (6,454,795) in view of PINCHASIK et al. (5,449,373).

As to claims 26-27, 29-30, CHUTTER discloses substantially all limitations as claimed, except for S-shaped connectors. PINCHASIK (Figs. 3A-3C) discloses S-shaped connectors 124 connecting adjacent closed diamond-shaped cells 108 for a differentially stretched and compressed curved configuration when PINCHASIK stent is flexed or for the stent to easily fit in a tortuous blood vessel (Fig. 3B). In view of PINCHASIK, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to provide S-shaped connectors to CHUTTER stent to provide flexibility to CHUTTER stent so as to make the stent to easily fit in a tortuous blood vessel.

As to claims 28 and 31, CHUTTER and PINCHASIK disclose substantially all limitations as claimed, except for five adjacent rows of closed cells connected by S-shaped connectors. PINCHASIK (Figs. 3A-3C) shows three adjacent closed cells connected by S-shaped connectors 124. It would have been obvious to one of ordinary skill in the art at the time of the invention was made to provide five adjacent closed cells connected by S-shaped connectors 124 as claimed when a longer stent needed for a longer treatment site of a blood vessel.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
